PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, Manakula Vinayagar Institute of Technology, 2026) with hands-on experience building and deploying full-stack web applications using React.js, Node.js, Express.js, MongoDB, and PostgreSQL. Independently shipped two production-grade projects — a role-based visitor management system (MERN stack, JWT authentication, RBAC across 3 user roles) and a secure messaging system with RSA-2048 encryption across 3+ concurrent client sessions. Completed a Full Stack Development internship contributing React components and Firebase authentication within a professional Agile team. Seeking a Full Stack Developer role to build scalable, user-facing systems from day one.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python

Frontend: React.js, HTML5, CSS3, Bootstrap 5, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, MQTT Protocol

Databases & Cloud: PostgreSQL, MongoDB, Firebase Firestore, Firebase Authentication, SQL

Tools & Platforms: Git, GitHub, VS Code, Linux, Vercel, Figma

Concepts: Component-Based Architecture, Real-Time Data Sync, RSA Encryption, CI/CD, Agile / Scrum

PROFESSIONAL EXPERIENCE

Full Stack Development Intern — Future Interns

Sep 2025 – Nov 2025

- Developed responsive React.js and Bootstrap 5 UI components, contributing production-ready code to the live team codebase.
- Configured Firebase Authentication and Firestore, enabling secure login flows and real-time data storage for **~40% faster manual auth setup**.
- Managed Git-based deployment workflows integrated with CI/CD pipelines on a live production codebase.
- Collaborated in Agile / Scrum sprints — participated in standups, sprint planning, and iterative feature delivery.

PROJECTS

Visitor Pass Management System

Repository Link

Tech Stack: React.js (Vite), Node.js, Express.js, MongoDB, JWT, Material UI, Vercel

- Architected a full-stack visitor management system using the MERN stack with a layered backend architecture (**Route → Controller → Service → Repository → Model**), separating business logic from HTTP handling for maintainability.
- Implemented JWT-based authentication and role-based access control (RBAC) across **3 user roles (Admin, Receptionist, Employee)**, enforcing 10+ business rules including duplicate-visit prevention and scheduling validation via custom Express middleware.
- Designed a MongoDB data model across 4 collections with an append-only activity log for full audit traceability; deployed via split-hosting architecture (Render backend, Vercel frontend, MongoDB Atlas) with live role-specific dashboards.

Secure Real-Time Messaging Application

Repository Link

Tech Stack: Python, RSA Encryption, MQTT Protocol, Tkinter

- Engineered a peer-to-peer messaging system using MQTT supporting **3+ concurrent client sessions** with low-latency real-time communication.
- Implemented end-to-end **RSA-2048 encryption** with dynamic key generation, ensuring message confidentiality without third-party library dependencies.
- Developed a Tkinter GUI supporting encrypted messaging, key management, and persistent chat history for a complete user experience.

EDUCATION

Manakula Vinayagar Institute of Technology — B.Tech — Computer Science & Engineering

Oct 2022 – May 2026 |

CGPA: 8.15

Lakshmi Chordia Memorial Matric. HSS, Cuddalore

Jun 2019 – Mar 2022 | SSLC: 90% | HSC: 85%

AREA OF INTEREST

Area of Interest: Full Stack Web Development, Database Management Systems, Computer Networks

CERTIFICATIONS

- JavaScript — Information Technology Specialist (Mar 2024)
- CCNA: Switching, Routing & Wireless Essentials — Cisco Networking Academy (Jun 2025)
